SUMMARY

DevSecOps / Platform Engineer specializing in multi-cloud infrastructure (AWS & GCP), backend automation with Go, and Infrastructure as Code (Terraform). Currently leading GCP self-service resource development and backend implementation for the company's first Internal Developer Platform, with a recent use case cutting a 30-90 day provisioning process down to under 2 hours across 5-6 global teams. Background also includes full-stack development (Java/Spring Boot, React) and a growing, hands-on foundation in testing, concurrency, and PostgreSQL. AWS Certified AI Practitioner. Self-taught programmer since 2022, later formalized through a Technologist degree in Internet Systems.

TECHNICAL SKILLS

Backend & Infrastructure: Go (Golang), Java (Spring Boot, Spring Security - JWT/RBAC), Terraform (IaC), Docker, CI/CD, GitOps

Cloud: AWS, Google Cloud Platform (GCP/Apigee) — multi-cloud environments

Databases: PostgreSQL, MySQL, DynamoDB (NoSQL), Relational Modeling (ERD)

Frontend: React, Next.js, TypeScript, TailwindCSS

Testing & Quality: JUnit, Mockito, AssertJ, Playwright, SonarQube

Observability: Prometheus, Grafana

PROFESSIONAL EXPERIENCE

DevSecOps Engineer — WPP Commerce (allocated to Whirlpool Corporation Brazil)

March 2026 - Present · 7 months | Remote, Brazil

Allocated to Whirlpool Corporation Brazil's IT Engineering squad, driving Platform Engineering, GCP self-service resource development, and backend automation across cloud environments for large-scale enterprise operations.

- **IDP & Self-Service Resources:** One of the core engineers on the GCP resource provisioning initiative within the company's first Internal Developer Platform, delivering Apigee as the first automatically provisioned resource for GCP and owning backend implementation.
- **GitOps & Platform Engineering:** Developed the GitOps approach for Platform Engineering, defining how the application interacts with repositories and enforcing idempotency across provisioning flows.
- **Business Impact:** For one use case, this automation cut a 30-90 day provisioning process down to under 2 hours across 5-6 global teams, estimated by the Global Engineering Sr Manager at ~\$31k in ROI per request.
- **FinOps & Cost Optimization:** Spearheaded cloud cost management initiatives, engineering automated scans that identified ~21,000 idle resources for deprovisioning, securing a projected 6-8% cost reduction.
- **Backend & Automation:** Engineered cloud service automations using Go (Golang) and developed provisioning UIs with React, drastically reducing manual boilerplate time.
- **Global Collaboration:** Work directly with engineering teams across Asia and North America as part of day-to-day delivery.
- **Agile & Delivery:** Managed complex version control workflows and sprint deliveries via Jira, ensuring CI/CD integrity and fast-paced feature resolution.

Software Engineer — Freelancer

May 2025 - February 2026 · 10 months | Remote, Brazil

Architected and built a full-stack e-commerce platform for a small food business (custom cake ordering), used in real production by the client.

- **Backend Architecture:** Designed the system using DDD and Clean Architecture principles (Java 21, Spring Boot), with clear domain/application/infrastructure separation.
- **Payments:** Integrated Stripe for end-to-end secure payment processing, including webhook handling.
- **Cloud & IaC:** Provisioned the entire infrastructure using Terraform on AWS — VPC, ECS, ECR, CloudFront, S3, Secrets Manager, and RDS.
- **Security:** Implemented authentication and access control using Spring Security with JWT.
- **Frontend:** Built the client interface with React.

EDUCATION

Technologist, Internet Systems

Fatec Baixada Santista Rubens Lara | February 2023 - June 2026

CERTIFICATIONS & COURSES

AWS Certified AI Practitioner — Amazon Web Services (AWS), September 2026

B2 First - Score 164 — Cambridge English, September 2021

AWS Cloud Practitioner Essentials — Amazon Web Services (AWS), September 2025

Endpoint Security — Cisco Networking Academy, September 2024

Go: Distributed Systems, Web Security & Advanced Concurrency — Rocketseat, April 2026

Software Engineering: Java, Spring Boot Ecosystem & Cloud Architecture — Rocketseat, January 2026

Next.js Full Stack: Stripe Integration, SSR & SEO Strategies — Rocketseat, February 2026

React Architecture: Design Patterns, State Management & E2E Testing — Rocketseat, October 2025

LANGUAGES

English — Fluent (Cambridge B2 First) | Portuguese — Native
